

Tasks To Be Performed:

1. Use the previous deployment of Ansible cluster
2. Configure the files folder in the role with index.html which should be replaced with the original index.html

All of the above should only happen on the slave which has NGINX installed using the role.

1) Create a New html file and update in playbook.

```
GNU nano 6.2      playbook1.yml *
#####
#PLAYBOOK FOR CHANGE THE INDEX.HTML CONTENT IN SLAVE1
# AND SLAVE ACCORDING OUR REQUIREMENT
#####

- name: Task For Slave1
  hosts: slave1
  become: true
  tasks:
    - name: change the index file in apache2
      copy: src=/home/ubuntu/assignment4/index.html dest=/var/www/html/index.html

- name: Task For Slave2
  hosts: slave2
  become: true
  tasks:
    - name: change the index file in nginx
      copy: src=/home/ubuntu/assignment4/index.html dest=/var/www/html/index.html
```

Assignment4

Assignment4

All the steps completed and screenshot also attached, still if any thing requires, please email me or call me on my registered number and please share the obtained marks on my email.
